

TASK DESCRIPTION: Identifying Right Hand and Left Hand Gearmotor/Winch

SPECIALIZED TOOLING REQUIRED: Eyes and knowing your left hand and your right hand

SAFETY EQUIPMENT REQUIRED: Safety glasses and steel toe workboots

INSTRUCTIONS

1. Stand in front of the Gearmotor with the brake facing you. The brake should be closer to you than the gearbox.
2. Look straight at the gearmotor. There will be a shaft sticking out of the gearbox either to the right >>>, which will be a right hand gearmotor or to the left <<<, which would be a left hand gearmotor
